3 - DAY TECHNICAL FEST

BROCHURE

ABOUT TECHFUSION 2.0

TechFusion 2.0 is a three-day inter college technical fest designed to bring together innovative minds, creative thinkers, developers, and technology enthusiasts. The fest provides a platform for students to showcase their skills, explore new ideas, and compete in exciting events such as Hackathon, Ideathon and E-Sports.

Participants will get the opportunity to collaborate, build innovative solutions, share ideas, and demonstrate their technical abilities while competing with talented students from different colleges.

HACKATHON

The Hackathon is an innovation challenge where participants work in teams to build creative technological solutions for real-world problems. Teams will brainstorm ideas, develop prototypes, and present their solutions to the judges.
This event encourages teamwork, innovation, and problem-solving while giving participants hands-on experience in developing practical solutions.

Checkout the Problem Statements in the next page

Event Details:

- **Mode:** Hybrid
- **Online Participation:** Registration fee ₹99 per member.
- **Offline On Campus Participation:** Registration fee ₹199 per member.
- **Team Size:** 2–4 members
- Two meals and refreshments will be provided for offline participants.
- Prizes & Certificates for the winners and Participation Certificates for all participants.

Prize pool upto 50,000+

HACKATHON PROBLEM STATEMENTS

THEME	DESCRIPTION
AI-Driven Cyber Defense for the Next Digital Era	Develop intelligent security solutions that use Artificial Intelligence to detect, prevent, and respond to cyber threats. Participants can explore innovative approaches such as threat detection, automated response systems, and predictive cybersecurity models.
Intelligent Systems for Real-World Decision Making	Create smart systems that assist in solving complex real-world problems through data analysis, machine learning, or automation. Solutions can focus on improving decision-making in areas like business, healthcare, transportation, or public services.
Web Platforms for Digital Transformation and Social Impact	Design web-based platforms that improve digital accessibility and create meaningful social impact. Participants can develop solutions that address challenges in education, governance, community engagement, or digital services.
IoT for Smart Infrastructure and Healthcare	Build Internet of Things (IoT) solutions that enhance smart infrastructure or healthcare systems. Ideas may include smart monitoring systems, connected healthcare devices, or intelligent infrastructure management for safer and more efficient environments.

HACKATHON PROBLEM STATEMENT OF ALGORAND

THEME:

Agentic Commerce Using Blockchain Technology

PROBLEM STATEMENT:

Open bounty platforms face trust issues around delivery and payouts.

DESCRIPTION:

What to build: A bounty system with escrowed funds and assisted completion checks.

Algorand-specific implementation approach: - Lock bounty funds in an application account at creation time. - Store bounty terms and deadline in contract state. - Submit completion proof hash via app call before release. - Enforce release/refund rules on-chain to minimize trust assumptions.

Core modules: - Bounty posting - Escrow lock - Submission validation - Release/dispute path

E2E implementation scope: - Post bounty and lock funds - Submit work artifact - Validate completion - Release payout or dispute

BENEFITS:

Choosing this statement doesn't just win you a trophy—it launches your career at the forefront of Web3 innovation. The winning team will be granted exclusive Internship Opportunities with Algorand and its ecosystem partners.

IDEATHON

Ideathon is a creative idea-generation competition where participants develop innovative solutions for a given problem statement. Teams will analyze the problem, develop a creative idea, and present their solution to the judges.
This event focuses on creativity, innovation, and strategic thinking.

Event Details:

- **Mode**: Hybrid
- **Registration Fee:** ₹99 per member (For both Online participation & Offline On Campus participation).
- **Team Size:** 2–4 members
- **Duration:** 6 Hours
- Problem statement will be released on day of the event.
- After 5-hours Shortlisted teams will present their ideas in front of the judges.
- Prizes & Certificates for the winners and Participation Certificates for all participants.
- Refreshments will be provided.

Prize pool upto 10,000+
