BROCHURE

ABOUT TECHFUSION 2.0

TechFusion 2.0 is a three-day inter college technical fest designed to bring together innovative minds, creative thinkers, developers, and technology enthusiasts. The fest provides a platform for students to showcase their skills, explore new ideas, and compete in exciting events such as Hackathon, Ideathon and E-Sports.

Participants will get the opportunity to collaborate, build innovative solutions, share ideas, and demonstrate their technical abilities while competing with talented students from different colleges.

HACKATHON PROBLEM STATEMENTS

THEME	DESCRIPTION
AI-Driven Cyber Defense for the Next Digital Era	Develop intelligent security solutions that use Artificial Intelligence to detect, prevent, and respond to cyber threats. Participants can explore innovative approaches such as threat detection, automated response systems, and predictive cybersecurity models.
Intelligent Systems for Real-World Decision Making	Create smart systems that assist in solving complex real-world problems through data analysis, machine learning, or automation. Solutions can focus on improving decision-making in areas like business, healthcare, transportation, or public services.
Web Platforms for Digital Transformation and Social Impact	Design web-based platforms that improve digital accessibility and create meaningful social impact. Participants can develop solutions that address challenges in education, governance, community engagement, or digital services.
IoT for Smart Infrastructure and Healthcare	Build Internet of Things (IoT) solutions that enhance smart infrastructure or healthcare systems. Ideas may include smart monitoring systems, connected healthcare devices, or intelligent infrastructure management for safer and more efficient environments.
